

Welcome to the Kletke Excellence Program!

The Kletke Excellence Program provides an opportunity beyond the average farm experience. We focus on growing your knowledge with hands-on experience in a wide range of farming activities while building your operations management and leadership skills all in your first experience. Returning for a second year the Kletke Excellence Program will offer the opportunity to further enhance your leadership and management skills with additional training and leadership opportunities. For others that wish to stay longer in Canada to travel and work at a ski resort, we can help arrange that experience.

The Experience and Opportunities

Working on the Kletke farm, you will gain experience in all areas of farming with the training and use of equipment such as large GPS guided tractors, combines and tele-handlers required for seeding, harvesting and baling.

The Kletke Excellence Program operations management training provides a “big picture” view of a Canadian farming business. We share how the business is managed to provide understanding of business risks, opportunities, operational efficiencies and their impact on the overall financial health of a farm.

In the Kletke Excellence Program, leadership skills will be developed in an encouraging and positive atmosphere. Through guidance and training, your abilities to lead others, negotiate, collaborate, problem solve, develop strong teamwork, improve communication, improve processes and organize activities will grow and become lifelong skills.

The Kletke Excellence Program delivers a positive and rewarding workplace that inspires growth and development all while encouraging a fun teamwork environment. The Kletke farm is located 40 minutes from the capital city of Winnipeg with over one million people, shopping centres, sports venues and entertainment. In the Kletke Excellence Program, time will be available to you to travel and visit other parts of Canada.
